create an HTML template file named `calculator.html` inside it. Here's a simple example:

```html
<!DOCTYPE html>
<html>
<head>
    <title>Calculator</title>
</head>
<body>
    <h1>Simple Calculator</h1>
    <form method="POST">
        <input type="text" name="num1" placeholder="Enter number 1" required>
        <input type="text" name="num2" placeholder="Enter number 2" required>
        <select name="operation">
            <option value="add">Add</option>
            <option value="subtract">Subtract</option>
            <option value="multiply">Multiply</option>
            <option value="divide">Divide</option>
        </select>
        <input type="submit" value="Calculate">
    </form>
    <br>
    {% if result %}
    <p>Result: {{ result }}</p>
    {% endif %}
</body>
</html>
```
